

COMMUNITY PANELS FOR BLOOD CANCERS

Accelerate your analysis with pre-designed and tested panels

HIGHLIGHTS

- Uniform coverage of target regions
- High quality probe design to optimize on-target rate
- Customizable gene content developed with genomic experts in hematological malignancies
- Simple and reliable data analysis and interpretation

Designing, creating, and testing a new gene panel takes considerable time and effort. **SOPHiA GENETICS™ Community Panels for Blood Cancers** are **targeted, capture-based NGS panels** developed and tested by genomic experts to minimize set-up challenges and accelerate your research. These panels cover a wide range of genes related to Hematological Malignancies and are fully customizable, with the flexibility to add or remove genes to meet your unique requirements.

In combination with the analytical and interpretation capabilities of the SOPHiA DDM™ Platform, our Community Panels help you to gain accurate and cost-effective insights from your target regions of interest.

VARIANT STATUS REPORT GENERATION

For a fast and worry-free transition to routine analysis, the **SOPHiA GENETICS™ Set Up Program** provides full set-up assistance.

The SOPHiA GENETICS™ **Community Panels** leverage on the SOPHiA DDM™ Platform to ensure accurate variant detection and streamlined variant assessment.

About SOPHiA GENETICS

SOPHiA GENETICS (Nasdaq: SOPH) is a healthcare technology company dedicated to establishing the practice of data-driven medicine as the standard of care and for life sciences research. It is the creator of the SOPHiA DDM™ Platform, a cloud-based SaaS platform capable of analyzing data and generating insights from complex multimodal data sets and different diagnostic modalities. The SOPHiA DDM™ Platform and related solutions, products and services are currently used by more than 750 hospital, laboratory, and biopharma institutions globally.
